

SHARI'AH

PORTFOLIO OVERVIEW

The risk profile of this single manager fund is moderate aggressive and can therefore be compared to the Consolidation and the Accumulation portfolios. The fund's performance may be different to the performance of funds with similar investment objectives that do not subscribe to Islamic investment guidelines and may also be different to the performance of the mandates that are currently used for the defined contribution investment strategies as the latter two strategies do not adhere to or implement such restrictive criteria and a multiple manager approach is followed.

PERFORMANCE BENCHMARK

45% Customised SA Shari'ah Equity Index; 10% S&P Developed Markets Shari'ah Index; 40% STeFI Composite Index - 0.5%; 5% 3-month US LIBOR.

INSTITUTIONAL PEER GROUP

PRINCIPLES THAT GOVERN SHARI'AH INVESTING

Five main principles:

- **Ban on Interest:** According to Shari'ah law both parties need to take risk when profit is earned, therefore one cannot invest in conventional fixed interest instruments.
- **Ban on uncertainty:** In terms of Islamic principles the future outcome of an investment needs to be free of major uncertainty. Speculative financial instruments like options and other derivatives therefore may not be used.
- **Ban on financing certain economic sectors** that are deemed to be non-permissible such as non-halal meat products, gambling companies, weapon production, etc.
- **Profit and loss sharing principle:** Both parties to the financial transaction must share in the risks and the rewards attached to it.
- **Asset-backing principle:** Each transaction needs to be backed by or linked to a tangible underlying asset.

The fund adheres to the standards of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as interpreted by the Shari'ah Supervisory Board.
